

COLT DEFENSE LAW ENFORCEMENT CARBINE W/MONOLITHIC UPPER & FU

An evolution of the 6920. This rifle features Colts monolithic upper receiver. In addition to an uninterrupted full length front rail, this upper receiver allows for a free floated barrel. Features a gas block mounted front flip up sight with bayonet lug and a MaTech backup rear sight. The barrel is Colts standard 16.1" chrome lined M4 barrel with an A2 flashhider.

COLT AR-15 A2 CARBINE

The Colt SMG fires from a closed bolt, is equipped with a collapsible buttstock, and is easily field stripped without the need of any special tools. The straight-line construction, coupled with the low recoil of 9mm ammunition, provides highly accurate fire with less muzzle climb, especially in full automatic fire. Less recoil also facilitates ease of training and improves accuracy.

COLT

Differentiated only by the longer barrel length and the semi-automatic fire controls, Colt's LESOCOM is the closest rifle to the M4A1 platform issued by the United States Armed Forces. With an extended stock, this M4 carbine has an overall length of 35 inches, 16.1 accounted for in the barrel. Offered in an anodized black finish, this tactical rifle comes out of the box ready to shoot, chambered in 5.56 x 45 NATO (.223 Remington) with a Matech rear back-up iron sight for acquiring distances of 600-meters, effectively. For left-handed shooters, an ambidextrous fire control selector comes as standard issue. Also standard on the Colt LESOCOM rifle is a Knights™ Armament Rail System with the capability to be outfitted with the user's preferred optics and accessories at the three, six, nine and 12 o'clock positions.

COLT MODULAR LE901 CARBINE

The rifle can be deployed in 7.62mm/.308 with either a 13- or 16-inch barrel. For closer quarters engagements at 5.56mm/.223, officers can swap out the upper receiver and, with an internal adapter that bolts to the upper, deploy the rifle with a 10.3-, 14.5- or 16-inch barrel. The LE901 also arrives with a Vltor collapsible stock (IMod) with four positions. It offers ambidextrous controls — an ambi magazine catch and bolt release.

CZ 527 VARMINT TARGET

The new pattern of the Varmint Kevlar has been updated with a wide fore-end, vertical grip and hooked butt. The new design is optimized for shooting from a bipod or a front rest while remaining comfortable enough for offhand shooting. The varmint/target model features a 24" hammer forged barrel and a Kevlar composite stock with an aluminum bedding block to resist the elements and provide the ultimate in accuracy.
