# INTRODUCING THE CZ 455 EVOLUTION

WITH HEAVY VARMINT BARREL

**CZ 455 Varmint
with Heavy Varmint Barrel**

Modern and ergonomic design makes from this rimfire rifle the evolutionary firearm – it advances established types into further dimension. The great advantage of the stock is that its configuration is fully ambidextrous. The bolt action handle is placed on the right-hand side only. A well-proven barreled action of the CZ 455 is complemented with thick-walled barrel in order to secure accuracy of fire for intermediate to long distances and also enables, without effects caused by the barrel temperature, a many more subsequent shots. This rimfire rifle is designated to be shot with optical sights the reliable attachment of which is provided by the dovetail at the upper section of the receiver.

The CZ 455 Evolution comes as standard with a 5-round plastic magazine, with a 10-round magazine as optional.
